## Profile

Recent Post graduate with a keen interest in web development, specifically MERN stack development seeking entry-level opportunities to apply skills in web development and contribute to innovative projects.

## Certificates

- Geeksforgeeks Certification for Training and Internship
- Coding Cloud Certification for Internship

## Languages

English • Hindi • Marathi

## Education

**M Pham**  
2021 – 2023

**B Pharm**  
2019 – 2023

## Skills

HTML, CSS, JavaScript, React JS, NodeJs, Express JS, Mango DB, Postman, Web Development, github, Next Js

## Interests

- Traveling

## Projects

### School Management System (MERN Stack, JWT, Docker)

- Built a scalable school management platform with a multi-tenant architecture for managing multiple schools. Added role-based access for admins, teachers, and students with JWT authentication and data security. Optimized performance with a modular API for easy scaling and future updates.

### E-Commerce Platform (MERN Stack, Redux, Heroku, MongoDB Atlas)

- Developed a full-stack e-commerce application with user authentication, product management, and a secure shopping cart. Implemented RESTful APIs, used Redux for state management. Deployed on Heroku with MongoDB Atlas for scalable database management.

### Minor Projects – MERN Stack

- Food Delivery App:** Developed a food ordering platform with real-time order tracking and payment integration.
- Food Recipe App:** Created a dynamic recipe-sharing platform with ingredient search and step-by-step guides.
- ProShop (E-Commerce):** Built a feature-rich shopping app with product listings, cart management, and checkout functionality.
- Spotify Clone:** Designed a music streaming app with playlist management and real-time audio playback.
- Weather App:** Developed a weather forecast app using an external API for real-time weather updates.
- File Sharing App:** Implemented a secure file-sharing system with upload, download, and link-sharing features.
- Browser Extension:** Created a custom browser extension for enhanced user functionality.

## Professional Experience

### WTL Tourism PVT LTD

Software developer (Intern)

Jan 2025 – present | Pune

### Bus Booking Website (MERN Stack, NodeMailer, Stripe)

- Developed a bus seat booking platform with real-time seat availability and tour package selection. Implemented automated email notifications for booking confirmations and integrated a secure payment gateway. Designed separate admin and user panels for efficient management and a seamless booking experience.

### Rental Car Expense Management (MERN Stack, Next.js)

- Developed a rental car expense tracking system with a master admin overseeing multiple sub-admins. Implemented role-based access control for managing drivers, cab assignments, and expense submissions. Integrated features for tracking fuel costs, tire puncture expenses, and other operational costs. Designed an annual expense reporting system for financial insights and decision-making.

### Coding Cloud

Software developer (Intern)

Jun 2024 – Dec 2024 | Pune

### Prescripto – Doctor Appointment Booking System

( MERN Stack, Cloudinary, Payment Gateway)

- Developed a doctor appointment scheduling platform with date-based and time-slot selection. Implemented an admin (doctor) approval system and integrated a secure payment gateway for seamless transactions. Utilized Cloudinary for efficient doctor profile image management, ensuring a smooth user experience.

### E-Commerce Shopping App (React, Node.js, Express, MongoDB, Stripe, Cloudinary)

- Built a responsive e-commerce platform with product listings, user authentication, and secure payments via Stripe. Integrated Cloudinary for efficient product image management, ensuring a seamless shopping experience.
